

As a young independent technology company, **1C Composite Engineering GmbH** develops individual, innovative and demand-oriented solutions around the production of complex composite integral components, for the automotive, medical technology, mechanical engineering and aerospace sectors.

To support our team we are looking for an employee as soon as possible with several years of experience in the field of component and tool design.

## Engineer/Technician for 3D-CAD processing (m/f/x)

### Your tasks:

- Analysis and evaluation of customer requirements, creation of production-ready documents as well as 3D CAD design models.
- Selection of supplier components and, if necessary, corresponding suppliers
- Communication interface with our customers, e.g., for the coordination of technical solutions, and other involved partners for the efficient handling of the projects
- Dimensioning, design and construction of individual components up to complex assemblies
- Preparation of parts lists, production instructions, documentations and plans

### Your profile:

- Completed studies in the field of mechanical engineering or comparable qualification, e.g., technician with corresponding professional experience as a design engineer
- Several years of professional experience
- Mastery of the technical rules for the preparation of production drawings and parts lists
- Experience in complex design tasks and technical project management
- Secure handling of 3D-CAD programs and MS Office, experience in handling IT systems would be advantageous
- Knowledge of German would be desirable, but not a requirement
- Independent, motivated work with a high level of self-control

### Our offer:

In addition to a cooperation characterized by appreciation and personal responsibility, we offer an attractive salary model, the necessary creative freedom to participate in varied, challenging projects and tasks. We sustainably promote the professional development of our employees through qualified training measures.

If you are interested in a challenging and versatile position, please send your application documents, including your salary expectations and possible starting date, to the attention of Ms. Petra Lacher at [bewerbung@firstcomposites.de](mailto:bewerbung@firstcomposites.de).

## We look forward to your application!
